## Key Risks

Risk Type	Risk Description	Risk Mitigation
Economic Risk	Changes in economic conditions, including, for example, inflation, new government regulations, political events and trends can affect the Fund's prospects.	Regular monitoring of macroeconomic conditions and regulatory trends in laws is being carried out by the Fund Manager. Proactive steps are taken to mitigate or minimize the impact as much as possible.
Legal and Regulatory Risk	Failure to adhere to laws, rules and regulations as stipulated by CMA can result in suspension of trading or cancelation of the Fund's listing.	The Fund Manager has recruited qualified personnel to manage the Fund and monitor all regulatory requirements such as compliance and risk management. These qualified personnel take all necessary steps for establishing and confirming to avoid any non-compliant practices under the supervision of the Fund Manager.
Occupancy Risk	Risk when expected occupancy rates are not achieved, which affects the profitability of the Fund.	All properties acquired by the Fund have strong economic fundamentals and cash-generation characteristics, thus providing significant margins of safety on occupancy rates. The Fund normally engages in long term leases ranging between 3 and 20 years with notice period of 12 months, which also mitigates the risk of not achieving the expected occupancy rates.
Development Risk	Development risks associated with real estate projects under development include: Delay in construction, costs exceeding planned allocations that may affect the profitability and / or financial feasibility of the Project.	Currently, all the properties owned by the Fund are fully developed. Thereby there is no development risk exposure towards the Fund.
Credit Risk	Risks relating to the inability of tenants to meet their payment obligations towards the Fund.	Credit analysis/ assessment is conducted by the Fund Manager before on boarding any new tenants. For the existing tenants, regular monitoring of outstanding dues towards the Fund and follow up for payments is done by the Fund Manager.
Financing Risk	Financing risk occurs when the Fund is unable to raise financing from market to continue/expand its operation.	The Fund has a committed SAR 1 billion credit line facility from Banque Saudi Fransi out of which 397 million is unutilised, which assures that the financing risk is at a minimal.
Lease Renewal Risk	Lease renewal risk is the risk of nonrenewal of existing leases or renewal at lower than current lease rate that might impact the rental income of the Fund.	The Fund enters into long-term operating lease contracts with tenants for space in its investment properties with lease terms ranging between 3 and 20 years. These operating leases provide tenant to pay the base rent with provisions for contractual increase in the rent.

Risk Type	Risk Description	Risk Mitigation
Risk of neglecting the property	Any adverse event leading to structural damage to properties owned by the Fund thereby risking the income generating potential from such properties.	All the properties are insured by the Fund which covers for all property damages. The Fund Manager ensures that the insurance coverage is adequate under public liability and property all risks insurance.
Counterparty Concentration Risk	This risk arises when a single counterparty has the most concentration of leased assets, this might lead to an adverse condition if the counterparty has troubles in future.	A major portion of the Fund's leasing income is derived from Al Muhaideb Group. If, this lessee was to serve the Fund notice in the next few years, it could expose the Fund to a high cashflow risk. This risk is being mitigated by growing the portfolio over a range of tenants and diversification of the Fund by investing in other funds. During 2021, The Fund has received a dividend payment from the investment in the real estate investment Fund which represents 11% of the Fund's total revenue.
Sector Concentration Risk	This risk arises when all assets belong to the same sector, this might lead to an adverse condition if that location has trouble in future.	The Fund has diversified the real estate assets across office, residential, commercial and hospitality properties. And it continuously explores various options for diversification.
Interest Rate Risk	The risk arises due to increase in interest rate impacting the Fund's net income.	The Fund Manager analyses its interest rate exposure on a regular basis by monitoring interest rate trends and believes that the impact of such changes is not significant to the Fund. In addition to this, the Fund has revolving credit line with profit rates reset every 6 months at SAIBOR + 2%.
Liquidity Risk	The risk of the Fund not being able to meet short term financial demands or unable to meet any payment obligations for exiting property.	Cash flow generated from operating the property portfolio represents the primary source of liquidity used to service the interest on debt, fund's general and administrative expenses. The Fund Manager ensures that there are adequate funds to repay obligation in a timely and cost-effective manner. The Fund has an unutilised line of credit of SAR 397 million with bank which partly mitigates the liquidity risk.
Asset Valuation Risk	Incorrect valuation of the properties resulting in notional and reputational losses.	The Fund Manager ensures clear communication of most up to date required information to the external professional valuers for valuation of the properties to reduce the risk of inaccurate valuation. Moreover, valuations are carried out by two independent valuers accredited by the Saudi Authority for Accredited Valuers (TAQEEM). The Fund Manager uses the average of two valuations for reporting and decision making.
Environmental, Social & Governance (ESG) Risk	Environmental, Social, and Governance (ESG) risks refer to the three factors in measuring the sustainability and societal impact of an investment.	As part of the traditional financial analysis and due diligence, the risks arising due to environmental issues of properties and environmental regulation are accounted in the valuation processes by the independent valuers. The increased awareness of Fund Manager about ESG risks, do not guarantee that its financial results will not be negatively impacted by the occurrence of any such event.

## Conclusion

The Jadwa REIT Saudi Fund is exposed to various risks as identified above which may impact the performance of the Fund. These risks have been mitigated by the actions taken by the Fund Manager to some extent. The Fund Manager is continuously exploring new investments and diversification opportunities to provide a stable stream of income to the investors.

The Fund is exposed to a counterparty concentration risk since a major portion of the leasing income is derived from Al Muhaideb Group. However, investment in REIF has resulted in the diversification of income. The Fund is well diversified between commercial, industrial and residential properties, which lowers the sector concentration risk of the Fund. The Fund has acquired additional property in 2021 by raising capital. Unutilized credit facility of SAR 397 Mn helps the Fund maintain a flexible balance sheet for acquiring new assets swiftly and efficiently.

There has been improvement in the Fund's performance in 2021 as compared to 2020. Overall risk of the Fund has improved from "Average / Moderate" to "**Below Average / Low**"
